

GIREVOLE CHIMNEY CAP

ART. 1220

STAINLESS
STEEL

COPPER

Usage of the product:

This is a special type of rotating chimney cap which turns around according to the direction of the wind. In this way the flue allows smoke to escape without impediment.

Installation instructions:

Install on the terminal part of the chimney flue. Fix by means of a flue clamp. Do not use a silicon sealant only. Do not install on forced air flue pipes. If mounted on combustion chimneys make sure that the minimum height from the combustion area is at least 4 m. and carry out yearly maintenance. Installation of the chimney cap must be carried out by qualified personnel.

Available for Single Wall flue pipes, both male and female, and for square or rectangular chimney.

EC Certification in conformity with EN 1856-1:
- Resistance to flow.
