

# FALDALE PIOMBO

## Descrizione

Il faldale raccorda la canna fumaria al tetto, prevenendo infiltrazioni d'acqua. È adatto a tetti piani o inclinati fino a 60° e va abbinato alla scossalina (Art. SCO) per una corretta impermeabilizzazione. La falda in piombo è facilmente modellabile.

The flashing connects the flue to the roof, preventing water infiltration. It is suitable for flat roofs or roofs with slopes up to 60° and should be paired with the flashing (Art. SCO) for proper sealing. The lead flashing is highly flexible.
